

GRAPHIC PROCESS AUTOMATION

The Stomper is a Semi-Automatic In Feed Heat Transfer Machine. Designed for the demands of high volume production. The 40X50 Version has 4 zones of independent heat control and 5 zones of pressure control. The In Feed Trampoline is an over and under design allowing the loading of one Trampoline while the other is being pressed. The 4 Temperature Controllers control each zone for faster and more even heating. The 5 Pressure Regulators Control the evenness of the pressure. Current applications are Dye Sublimation, Foil, Heat Transfers, etc.
